Introduction: Creating in Brightspace From Scratch

Welcome to the Professional Writing Guide to creating a course in Brightspace from scratch. This guide will include helpful tools, tips, and screenshots to give instructors the resources they need to build courses for the summer and fall of 2020 in Purdue's new Course Management System.

While there are tools that allow instructors to import content from Blackboard to Brightspace, it is the PW program's official recommendation that instructors only import Blackboard content for archival purposes as Blackboard is discontinued in August of 2020. This recommendation is rooted in three major points:

1. Many aspects of Blackboard content, such as the calendar, assignments, and gradebook, do not transfer over seamlessly, and result in additional work for instructors as they attempt to adapt their courses to the new system. Examples of this include duplicate calendar items and repeated due dates, things that cause confusion for students.
2. Building directly in Brightspace allows instructors to get a better handle on the tools Brightspace has to offer. While this new system has many similarities to Blackboard, it also features new robust technological tools that can provide both instructors and students with new tools that improve and enrich the learning experience.
3. Familiarity with the new system allows instructors to better serve the student populations they teach, giving them more experience with the tools students will be using in both face-to-face and online courses. If students have questions about the new system, they are more likely to reach out to their instructor for clarification and answers, meaning the more experience an instructor can have in Brightspace, the more they are able to serve the student population.

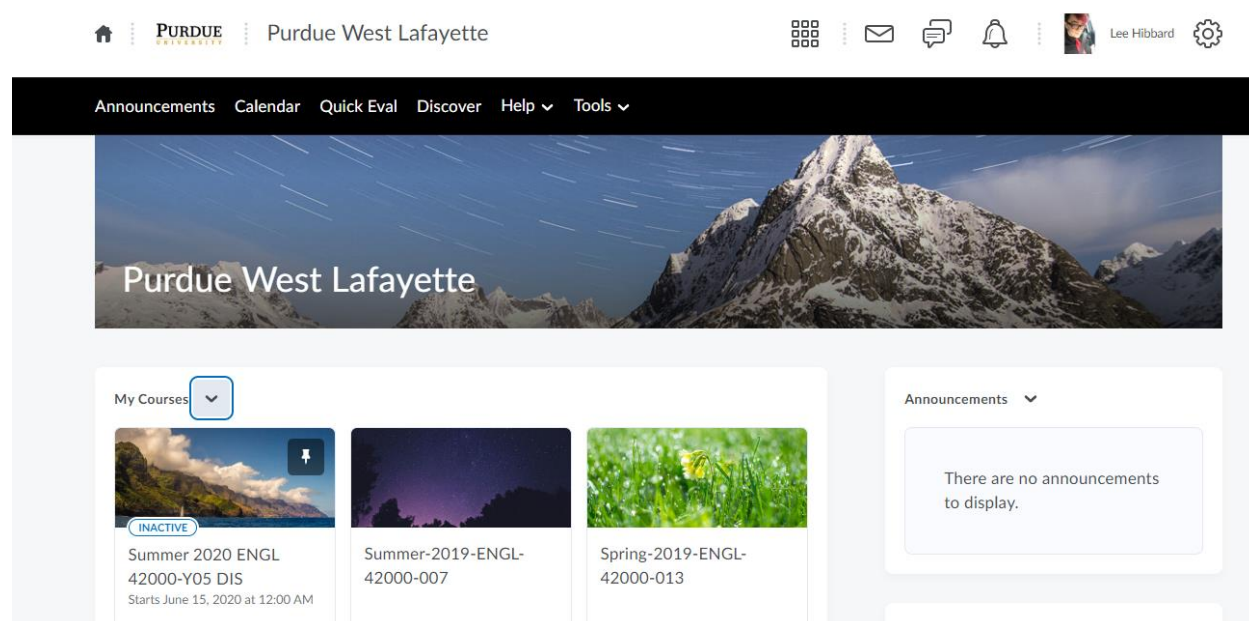

Creating a course from scratch in Brightspace is the simplest way to gain experience with the new system, and the guide that follows provides instructions, useful tools, and easy to follow steps to establish and activate a Brightspace course.

1. Getting Started with Brightspace

Section 1 of this guide will give instructors an overview of accessing Brightspace and how to engage with rudimentary navigation and formatting tools.

1.1: Accessing Brightspace

Begin by navigating to <http://purdue.brightspace.com>. Login by clicking through to West Lafayette and entering your information using BoilerKey. Once you are logged in, you will land on the Brightspace Homepage (see below). If you are already scheduled to teach courses, these courses should already be present in your Brightspace menu.

The screenshot shows the Brightspace homepage for a user named Lee Hibbard at Purdue West Lafayette. The page features a navigation bar with links for Announcements, Calendar, Quick Eval, Discover, Help, and Tools. Below the navigation bar is a large banner image of a mountain range with the text "Purdue West Lafayette". The main content area displays a "My Courses" section with three course cards: "Summer 2020 ENGL 42000-Y05 DIS" (Inactive, starts June 15, 2020 at 12:00 AM), "Summer-2019-ENGL-42000-007", and "Spring-2019-ENGL-42000-013". To the right of the course cards is an "Announcements" section with a message: "There are no announcements to display."

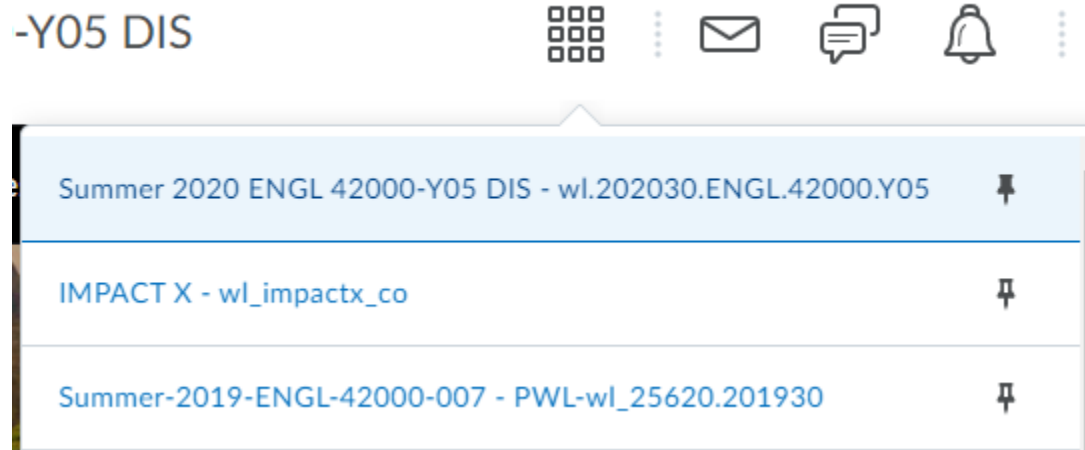

If you do not see the course you need, you can create a Course Development Shell via the instructions available [here](#).

1.2: Messages and Notifications

The top menu bar displays notifications and communication tools for Brightspace.

The nine small squares provide a drop-down menu of courses instructors are assigned to teach. You are also able to pin and unpin courses from this menu.

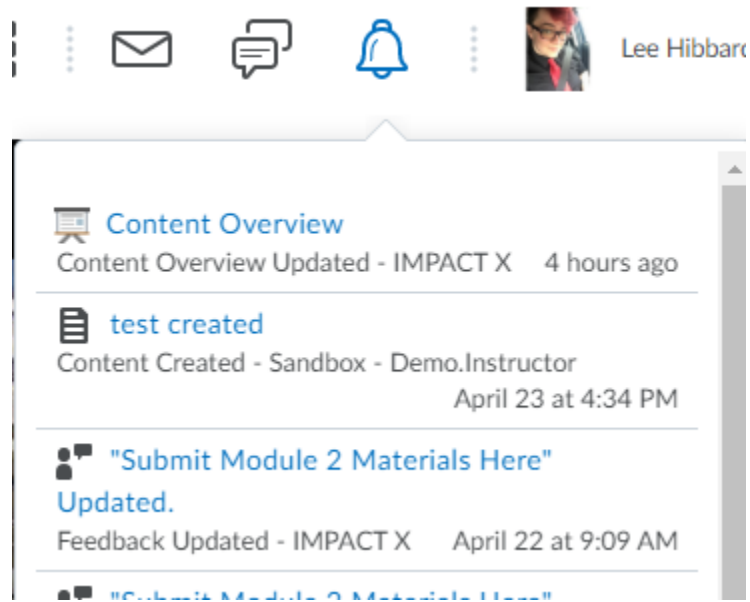

The envelope provides access to instant messaging and email services.

Existing instant message and email conversations appear below the two icons, and clicking either takes users to the messaging or email interface.

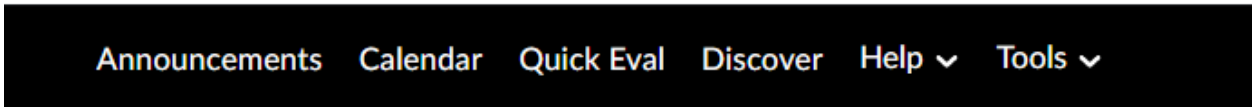

The speech bubbles provide alerts for subscriptions users can sign up for in their courses.

Finally, the bell displays update alerts, notifying users of changes or additions to their course and its contents.

1.3: Menus and Navigation

Brightspace has two upper menu bars and a lower course menu beneath the banner. Use the black navigation bar to access overall platform functions.

Announcements Calendar Quick Eval Discover Help ▾ Tools ▾

The **Announcements** tab displays updates instructors post to courses and collects announcements for all of the courses the user teaches. You can create course announcements from your course page.

The **Calendar** tab collects all scheduled assignments and meetings that are part of the user's courses. You can toggle individual calendar displays or display all calendar content together. Update the course calendar on the course page.

The **Quick Eval** tab provides instructors with information about recent items students have submitted for grading. Use this tab to stay up-to-date on the work your students have turned in.

The **Discover** tab takes you to publicly listed Brightspace Courses that are part of Purdue's system. It includes sandbox courses you can use to test new concepts and ideas. Use the **Help** tab for any questions you may have. The **Tools** tab will take you to the Course Creator.

To explore and modify your courses, select them from the icons below the main banner. Once you have navigated to the course page, the menu bar will have further functions available for each individual course.

The **Content** tab is the hub for all of the course content you upload and your students interact with.

Start at this page to modify your course content. See **section 2.2** for more detail on uploading your content and displaying it for your students to access.

The **Classlist** tab displays your students names and gives you access to tools that allow you to check student engagement and email your class.

You can also check individual students in a list on this page, see their ID and username information, and check their last date and time of access.

<input type="checkbox"/>	Image	Last Name ▲, First Name	Username	Org Defined ID	Role	Last Accessed

Use agents to automate feedback

Name ▲	Content Completed	Objectives	Logins	Grades
[REDACTED]	No content topics	No objectives	No logins	No grades

See section 2 for information regarding the course content dropdown menu.

1.4: Understanding Progress Bars

Each module and section of the course displays a progress bar that fills as students complete the tasks present on the page. Progress Bars are useful tools to help students keep track of their accomplished tasks in a module or week.

Table of Contents ▼

Print

Note that progress bar completion includes successfully completing and turning in assignments, so students may have questions about the progress bar's characteristics and updates. You can also modify which assignments are required for completion. See **section 2.2** for more information.

2. Course Tools

2.1 - Using Course Tools: An Overview

Access the course tools via the dropdown menu on the navbar. The most pertinent of these tools will be explained in subsequent sections of this guide. For information about any of the tools not referenced, refer to the **Help** section of Brightspace.

The **Course Admin** tab contains links to all the major course tools, including those present in other sections of Brightspace. If you have trouble locating resources and items in other parts of Brightspace, the Course Admin page is a hub location for all the tools you need for your course, including announcements, course content, and the calendar.

The Assignments tab is the home for all assignments you create for your course. See **section 3** for more detail on creating assignments and **section 4** for linking assignments and the gradebook.

The Discussions tab is home to all discussion posts you create for your course. See **section 5** for more detail on creating and maintaining discussions.

The Quizzes tab is home to any quizzes you create for your course. See **section 6.3** for more information on creating quizzes.

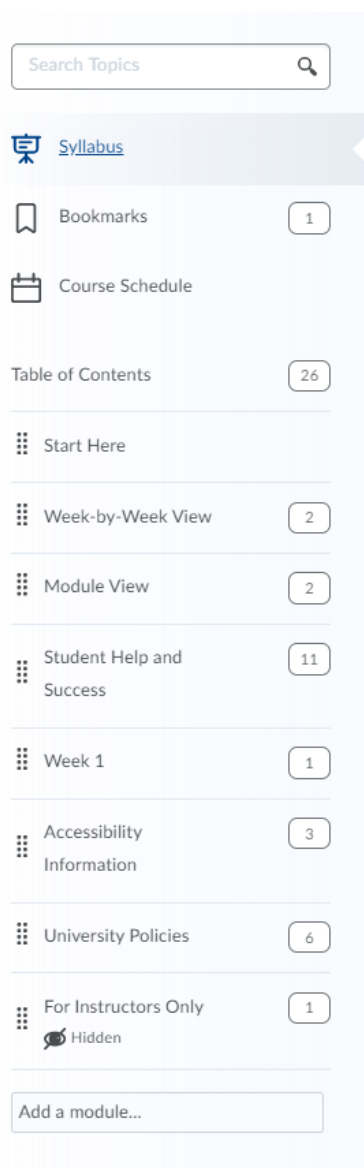

The Announcements tab allows you to create announcements to display and send to your class. See **section 2.3** for more information on creating and posting announcements.

The Groups tab allows you to group students for team activities and similar organization. See **section 6.1** for more information on creating and maintaining groups in Brightspace.

The Surveys tab provides tools for creating surveys that can be distributed to students via Brightspace. See **section 6.3** for more information on creating and utilizing surveys.

The Virtual Classroom tab gives you access to Virtual Classroom tools. See **section 6.2** for more information on utilizing the Virtual Classroom in Brightspace.

2.2 Creating Course Content

Access Course Content by clicking on Content in the black navigation bar. When a menu appears on the left side of the page, you'll see the following: Syllabus, Bookmarks, Course Schedule and Table of Contents. Items below Table of Contents include the pages you will modify to provide your students with course content. Some of these pages are pre-populated with information from Teaching and Learning Technologies. Make sure this information is up to date.

To rearrange the sections in the toolbar, click on the two rows of four dots on the left hand side of each module. Drag the modules into the order you want them to be in.

You have the option to hide sections by going to the page in question and clicking on the eye icon in the upper right hand corner. Use this function to hide items from students.

You can also create new module pages using the dialog box at the bottom of the column.

The Syllabus

Each page of a new course (that is, not imported from Blackboard) will include instructions for adding and modifying content.

Syllabus ▾

Welcome to [Course Name]

[Notes to you, the instructor, are bracketed, and italicized. Items you need to link, delete or input appear in blue. All other areas in this section can be used verbatim, as they are already written to the learners in the class, or you may customize to match your course, your voice, and teaching style. Remember to delete each bracketed and italicized note when using the template.]

It is worth mentioning the duration of this course, and also potentially directing learners to the Purdue Academic Calendar (<http://www.purdue.edu/registrar/calendars/2016-17-Academic-Calendar.html>).

- Class Start Date [insert date here].
- Class End Date [insert date here].

The Syllabus page includes requirements for Syllabus material and directs instructors to modify the content based on their own Syllabi. Modify this content by clicking on the text. It cannot be hidden or deleted and if left unmodified will display the sample document.

Course Presentation

Courses on Brightspace have two main set-ups: Week-by-Week View and Module View. Both are useful tools for students and instructors can use both or either to present their content. It is recommended to organize in a manner intuitive to students, with easy to follow instructions at the top of each page.

Week-by-Week View

Week view is most intuitive to online asynchronous learning, though it is functional for in-person learning as well. The Week-by-Week page includes instructions for providing content for students.

Week-by-Week View

Add dates and restrictions... 

Week 1 of this course will begin on [\[Insert date\]](#).

[Overview of section for Instructor using this Template: It is worth providing students with an overview of what they can expect from each week of the course, especially if the course is condensed to be less than 16 weeks. For learner convenience and success, each week will clearly describe what is expected of them. The first week of a course is typically front-loaded to cover all of the foundational material of the course, and it is helpful to let students know this. You will also see an area to list the specific action-oriented objectives of this week's work, and it is recommended to keep this number small, below 5 if possible. These objectives should ideally adhere to Bloom's Taxonomy so that the use of appropriate verbs can guide learners to best understanding what they are meant to be able to do. It is also worth including how the content from this week will build toward the overarching themes of the course. The course outcomes will be listed in the syllabus, and can be reinforced here to ensure that everything aligns to what the students will need to demonstrate success in this course. Please remember to delete this overview after completing section edits.]

This first week of our course has been front-loaded, so it is highly advised that you keep this in mind and complete the required reading as soon as possible.

1. Objective #1.
2. Objective #2.
3. Objective #3.

Like the Syllabus page, edit the content by clicking the text and modifying it. You can edit the page properties, or delete the entire module, using the title menu.

[Settings](#)

Add dates and restrictions...

Module 1 of this course will begin on [\[Insert date\]](#).

This week's content will prepare you to:

1. Objective #1.
2. Objective #2.
3. Objective #3.

These weekly objectives are directly connected to the Course Outcomes:

- Course Outcome #1.
- Course Outcome #2

NOTE ON TERMINOLOGY: Brightspace interchangeably uses the term ‘module’ to refer both to discrete course units and page units. References to modules therefore can be in reference to the Module View of the course overall and the Modules that are the pages you add or remove from your left course sidebar.

Adding Content to Module Pages

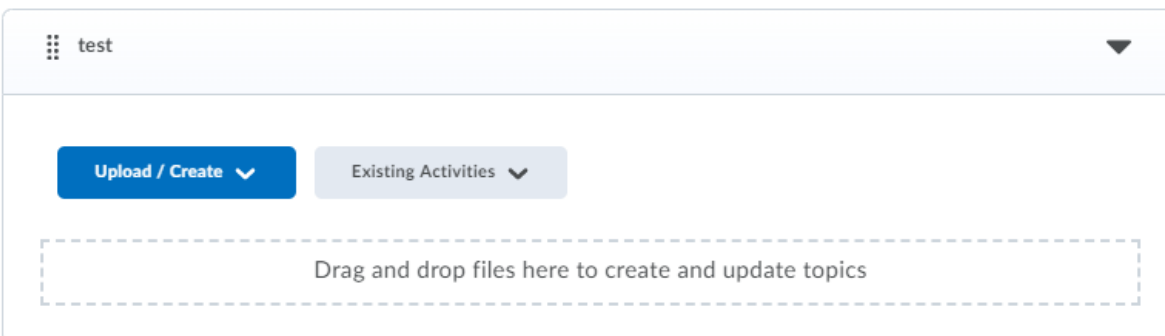

To add content to a page, use one of the dropdown menus below the main sub-module.

You can also enter the title of the section in the Add a Submodule box at the bottom of the page.

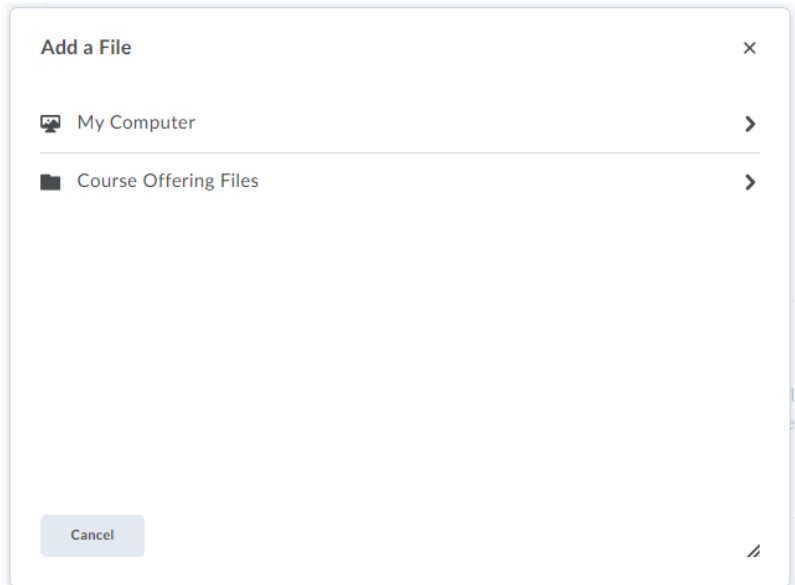

Add a sub-module...

You have the option to Upload/Create content for the sub-module and include existing content.

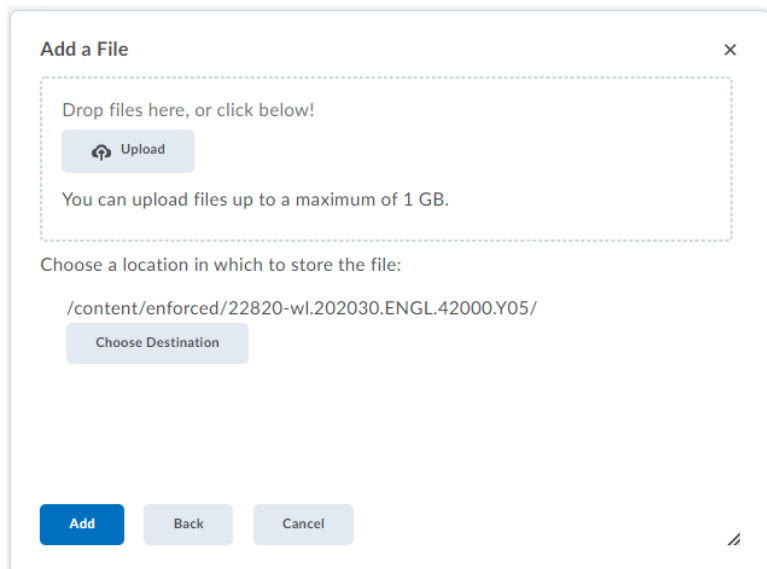

The Upload/Create tab gives you the option to upload files, create new items, and insert content. You can also select existing activities to insert.

Insert files via computer or what currently exists in the course.

Upload or drag and drop files to add them to the course.

The new module will appear on the page, and can be edited to include restrictions and descriptions of content using Edit Properties in-Place

The screenshot shows a list of course topics. The first topic is "Placeholder Video - Link to Media" (Link). The second is "Casual Conversation" (Discussion Topic) with a description: "This Discussion Board is for anything th... throughout the semester, but this is an... articles/videos/ideas that you think wo...". Below it is a "test" topic. The third is "test test" (Assignment) with a description: "test". The fourth is "Action Steps Checklist for All Modules" (Word Document), which has a context menu open. The menu options are: View Topic, Edit Properties In-place, Hide from Users, Change File, Download, Move Up, Move To, Edit Metadata, Publish to LOR, and Delete Topic.

The screenshot shows the configuration page for the "Action Steps Checklist for All Modules" (Word Document). It includes fields for "Start Date", "Due Date", and "End Date", each with a placeholder "Add start date...". Below these are "Release Conditions" with "Create" and "Browse" buttons. At the bottom of the configuration section are "Update" and "Cancel" buttons. Below the configuration is a rich text editor with a toolbar containing icons for video, image, link, paragraph style (set to "Paragraph"), bold, italic, underline, list, and more options. The text area contains the placeholder "description goes here". At the bottom of the editor are "Update" and "Cancel" buttons and a set of icons for undo, redo, search, and other editing functions.

You can create new files using the Upload/Create dropdown menu. The New options will open windows that allow you to create new assignments, quizzes, checklists, and so forth. See the respective sections on these types of content for information on creating them.

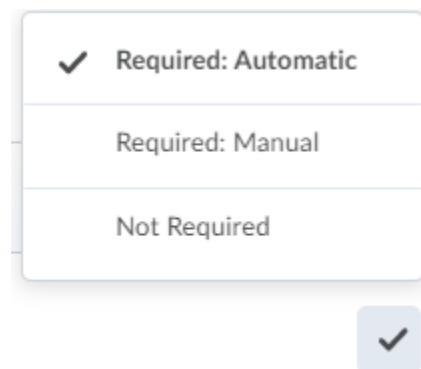

Inserting Existing content will allow you to add content you previously created in assignments, quizzes and other content areas. You can also insert discussion posts, files, and google drive items.

Modifying Progress Requirements

To modify requirements for progress bars, you can click the check mark next to each module on the page.

You can modify each module to be required, to be manually clicked by students to mark completion, or to exclude the item from completion.

2.3: Announcements

You can create announcements via multiple avenues: through the Course Tools drop-down menu, via the Course Admin tool, and via the Course homepage.

New Announcement

United States - Indianapolis

3. Assignments

This section covers creating and organizing Assignments. It also covers linking assignments to the gradebook, one of the most important features of Brightspace that differs from Blackboard. This section will also cover how to organize the gradebook and use annotations in the gradebook to grade assignments and give feedback.

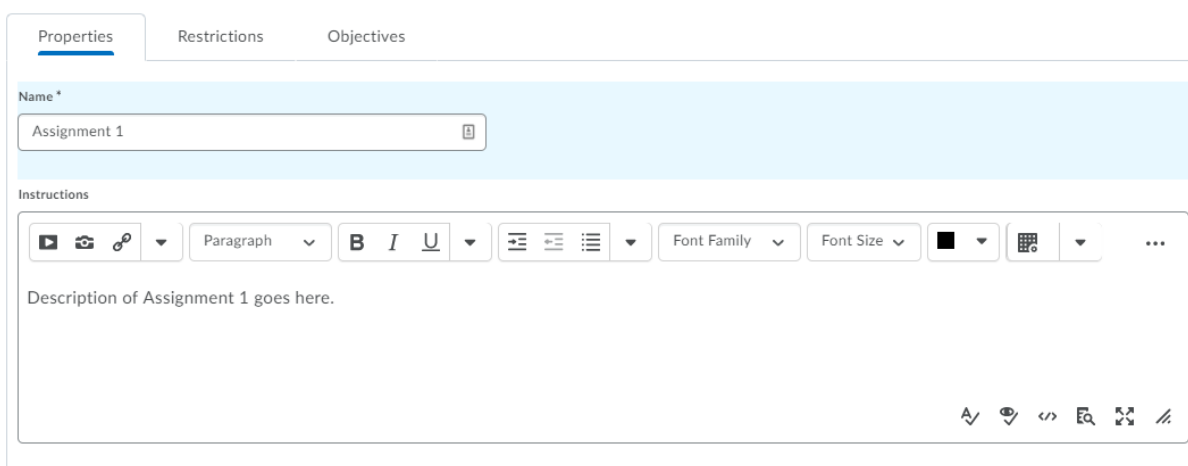

3.1 Creating Assignments

To create an assignment, go to the Assignments tab, via the Course Tools menu.

Select the New Assignment Button at the top of the page.

This will prompt a New Assignment Box, where you can enter your assignment's Title and Content.

The image shows a 'New Assignment Box' form. At the top, there are three tabs: 'Properties' (which is selected and underlined), 'Restrictions', and 'Objectives'. Below the tabs is a light blue header area with the text 'Name *' and a text input field containing 'Assignment 1'. Below this is a section labeled 'Instructions' which contains a rich text editor. The editor has a toolbar with icons for video, image, link, paragraph, bold, italic, underline, list, font family, font size, background color, and a grid. Below the toolbar is a text area with the placeholder text 'Description of Assignment 1 goes here.' At the bottom right of the text area are icons for undo, redo, source code, link, unlink, and a slash icon.

Below the text box, there are options to add attachments, as well as recording audio and video prompts for the assignment. Below this there are options for submission, completion, and categorization.

Annotation Tools

 Make annotation tools available for assessment

Below this you can preview the learner view, as well as edit it. You can only edit the preview if the assignment is associated with a grade item.

You have the option to associate a rubric with this assignment. See **section 4.4** for creating and utilizing rubrics in Brightspace. You can also use default rubrics for assignments, via the drop down menu.

The final option, Annotation Tools, makes annotation tools available for assessing student items. See **section 4.3** for more information on assessing student items with annotations.

There are also two other tabs available for assignments, one which allows for restrictions on release dates and times for the assignment, the other that connects the assignment to learning objectives.

The screenshot shows the 'Restrictions' tab selected among three tabs: 'Properties', 'Restrictions', and 'Objectives'. The interface includes several sections:

- Hide from Users:** A checkbox that is currently unchecked.
- Due Date:** A section with a checkbox for 'Has Due Date' (unchecked). Below it are three input fields: a date field containing '5/11/2020', a time field containing '5:20 PM', and a 'Now' button. Below these fields is the text 'United States - Indianapolis'.
- Availability:** A section with a checkbox for 'Has Start Date' (unchecked). Below it are three input fields: a date field containing '5/4/2020', a time field containing '1:20 PM', and a 'Now' button. Below these fields is the text 'United States - Indianapolis'.
- Has End Date:** A checkbox for 'Has End Date' (unchecked). Below it are three input fields: a date field containing '5/11/2020', a time field containing '5:20 PM', and a 'Now' button. Below these fields is the text 'United States - Indianapolis'.

Use this tab to add due dates and times to your assignments. You can also add start dates and end dates for turning assignments in, and hide or make visible the assignment to students.

You can also use the Objectives tab to connect the assignment to specific learning objectives. However, this is an optional function you can incorporate after mastering basic Brightspace functions, via the Help menu.

When you are done editing your Assignment, hit Save and Close and return to the main Assignments page.

Assignments

<input type="checkbox"/>	Final Adjusted Grade ▾			

See [section 4.1](#) for adding and connecting items to the Gradebook.

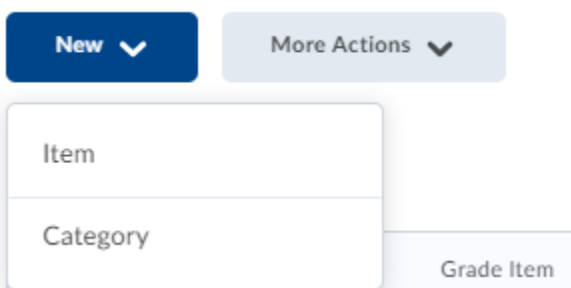

See [section 4.2](#) for organizing the gradebook.

4.1 Adding and Connecting Items in the Gradebook

In Brightspace, instructors must connect Assignments and other assessments to the Gradebook, something that you do not need to do in Blackboard. There are two methods for connecting items in the Gradebook. You can create gradebook items directly in the gradebook itself, or you can create them in the assignment, thereby connecting the assignment and the gradebook item in the process. Though the starting process is different, the outcome will be the same.

Creating Gradebook Items in the Gradebook

1. On the Manage Grades Page, select the blue New button and click Item.

2. Begin by selecting a new grade item type. Of the six options, the first, Numeric, is the most commonly used type for Professional Writing Assignments, and allows you to assign a grade out of a point value.

Choose a Grade Item Type

Numeric

Grade users by assigning a value out of a specified total number of points.

E.g. 8/10

3. Enter the name of the assignment.

7. Click Save and Close. The Assignment will now appear in the gradebook. After you hit save and close, the assignment will appear in the gradebook. To connect this grade item to a particular assignment, edit the associated assignment, as seen in the next section.

Creating Gradebook Items in Assignments

[This Section Adapted from materials shared by Linda Haynes and her 2019-2020 mentor group]

1. Go to your Assignments.

The screenshot shows the Canvas LMS interface for a course titled 'Spring 2020 ENGL 50500-010 LEC'. The 'Course Tools' dropdown menu is open, showing options such as 'Course Admin', 'Assignments', 'Discussions', 'Quizzes', 'Intelligent Agents', 'Announcements', 'Checklist', 'Groups', 'Surveys', 'Virtual Classroom', 'Video Assignments', 'Awards', 'Kaltura Media Gallery', and 'Kaltura My Media'. The main content area displays a table of assignments with columns for 'Evaluated', 'Feedback Published', and 'Due Date'.

Assignment	Evaluated	Feedback Published	Due Date
No Category			
Graded Assignment	0/9	0/9	Feb 20, 2020 11:30 PM
Weekly Lesson Plans			
Wk 1 Lesson Plan	0/9	0/9	Jan 12, 2020 11:30 PM
Wk 2 Lesson Plan	0/9	0/9	Jan 19, 2020 11:30 PM
Wk 3 Lesson Plan	0/9	0/9	Jan 26, 2020 11:30 PM
Wk 4 Lesson Plan	0/9	0/9	Feb 2, 2020 11:30 PM
Wk 5 Lesson Plan	0/9	0/9	Feb 9, 2020 11:30 PM
Wk 6 Lesson Plan	0/9	0/9	Feb 16, 2020 11:30 PM
Wk 7 Lesson Plan	0/9	0/9	Feb 23, 2020 2:21 AM

2. Click on the drop down next to the assignment and edit assignment

[Notice in the example below: Weeks 1-4 Lesson Plan Assignments have a “key” next to them, but the rest of the assignments do not. That is the “key” to understanding whether the assignment shows up in the gradebook or not!]

The screenshot shows the Canvas LMS interface for the 'Assignments' page. The 'Wk 3 Lesson Plan' assignment is selected, and the 'Edit Assignment' option is highlighted in the dropdown menu. The table shows columns for 'New', 'Completed', 'Evaluated', 'Feedback Published', and 'Due Date'.

Assignment	New	Completed	Evaluated	Feedback Published	Due Date
No Category					
Graded Assignment		0/9	0/9	0/9	Feb 20, 2020 11:30 PM
Weekly Lesson Plans					
Wk 1 Lesson Plan		1/9	0/9	0/9	Jan 12, 2020 11:30 PM
Wk 2 Lesson Plan		1/9	0/9	0/9	Jan 19, 2020 11:30 PM
Wk 3 Lesson Plan	1	1/9	0/9	0/9	Jan 26, 2020 11:30 PM
Wk 4 Lesson Plan		0/9	0/9	0/9	Feb 2, 2020 11:30 PM
Wk 5 Lesson Plan		0/9	0/9	0/9	Feb 9, 2020 11:30 PM
Wk 6 Lesson Plan		0/9	0/9	0/9	Feb 16, 2020 11:30 PM
Wk 7 Lesson Plan		0/9	0/9	0/9	Feb 23, 2020 2:21 AM
Wk 8 Lesson Plan		0/9	0/9	0/9	Mar 1, 2020 11:30 PM
Wk 9 Lesson Plan		0/9	0/9	0/9	Mar 8, 2020 11:30 PM
Wk 11 Lesson Plan		0/9	0/9	0/9	Mar 22, 2020 11:30 PM

- Click Edit Assignment, then scroll down. After you click Edit Assignment, scroll down until you reach Evaluation and Feedback. Click on New Grade Item to add a new item.

5. Under Category, you have the option to categorize your assignment. In the example below, the assignment is Weekly lesson Plans and is categorized as such.

The image shows a 'New Grade Item' dialog box with the following fields and options:

- Name:** Week 5 Lesson Plan
- Short Name:** W5L5P
- Category:** Weekly Lesson Plans (selected)
- Grading:** (partially visible)

The background page shows the 'New Grade Item' form with the following sections:

- General:** Name, Type, Number
- Evaluation and Feedback:** Evaluation and Feedback, Evaluation and Feedback
- Grading:** Grading, Grading

6. Save and close. If you now look at your assignment list, you will see a little key icon next to the assignment. The Assignment is now attached to the gradebook.

To associate an assignment with an existing grade item, follow the instructions above up to step 3. Instead of selecting [New Grade Item], select the Grade Item drop down menu and choose from the listed grade items.

Grade Item

[\[New Grade Item\]](#)

- None
- Test Assignment 1
- Test Assignment
- Assignment 1

This will associate the assignment with the previously made grade item. Click on Save and Close, and the key icon will appear in your gradebook next to the assignment.

For further information on associating gradebook and assignment items, refer to the Help menu. As this is the biggest difference between Blackboard and Brightspace, it pays to make some test assignments before creating them for your class.

4.2: Organizing the Gradebook

Use the Gradebook Setup Wizard to set your display and grading scheme options. These can be changed any time once you complete the Setup Wizard, and the Setup Wizard tab will display grading options. You can create new grade categories, new grade items, new grade schemes, and also manage these items in your gradebook.

Enter Grades Manage Grades Schemes **Setup Wizard**

You are now ready to create grade items and categories

4.3: Using Annotations to Grade Assignments

This section adapted from the 'Add Feedback and Evaluations to Assignments' page on Brightspace Help, featuring screenshots taken by Tracy Clark.

The annotation tools in Brightspace's inline grading interface provide instructors with options for robust and personalized feedback for students. To make use of the annotation tools, use the Evaluate Submission page.

The screenshot displays the Brightspace interface for evaluating a submission. The main document viewer shows a text document with several annotations: green highlights on phrases like "Tesla Truck", "sharp, angular body panels, led strips as headlights and taillights, and an overall shape closely resembling a wedge, many people were quick to judge the truck as a joke.", and "with acceleration and towing capabilities up to par or exceeding other trucks in the price range." A red box highlights a paragraph starting with "I think this truck is particularly important for Tesla because they are trying to win over one of the most loyal automobile consumers in the world; truck owners. Truck owners will buy the same truck model for decades in a row, and it has historically been very hard to change their vehicle of choice." The right sidebar shows the "Evaluation and Feedback" section, including a rubric selection area (with options for "Associate Rubric" and "Create Rubric"), a score input field (set to 8/10), and a "Student View Preview" section. The top navigation includes "Back to Submissions" and "Mock Individual Assignment" details.

You can mark up submissions if you have built-in annotations turned on. These markup and annotations include highlighting, drawing, shapes, and commenting. Use the icons in the document viewer toolbar to select between the different tools: Pen, Note, Text, and Line. Each tool has options for making customized changes in things like color, font, and size.

The image shows three sequential screenshots of the document viewer toolbar, illustrating the configuration of different annotation tools. The first screenshot shows the "Pen" tool selected, with options for color (various colored circles) and line style (solid, dashed, dotted). The second screenshot shows the "Note" tool selected, with options for font color (A), font size (5 pt), and line style. The third screenshot shows the "Text" tool selected, with options for color (various colored circles) and font size (Multiply).

When the feedback is published, your students can view their submission with the annotations visible.

As you may have heard, Tesla recently announced its newest addition to its automotive lineup, the **Tesla Truck**. This was Tesla's first entry into the truck market, and it is perhaps the most controversial launch from Tesla due to several reasons. First of all, the truck's looks are very polarizing to say the least. With **sharp, angular body panels, led strips as headlights and taillights, and an overall shape closely resembling a wedge, many people were quick to judge the truck as a joke**. However, the specifications of the truck speak for

Note

This is indeed an exciting development -- and I would be interested to know more about how this pertains to your envisioned career field.

they prove that the truck must be taken seriously by both consumers and manufacturers.

The base model will have a **starting price of \$39,900, and have a 250+ mile range and towing capabilities up to par or exceeding other trucks in the price range. The top of the line model will get you a truck with 500+ mile range and a 0-60 mph time of 2.9 seconds, faster than most sports cars from Ferrari, Porsche, and Mercedes-Benz.** There is nothing in the price range, or any truck in the world for that matter, that can match the capabilities that this truck will have.

The truck is particularly important for Tesla because they are trying to win over one of the most loyal automobile consumers in the world; truck owners. Truck owners will buy the same truck model for decades in a row, and it has historically been very hard to change their vehicle of choice. Tesla is one of the first to try to appeal an electric truck to consumers, and its success in doing so will be a very important milestone for electric automobile manufacturers.

Instructors can enter a score in the Score field, some end comments in the Feedback field -- and, if they'd like, they can Add a File, Record Audio (1 minute limit), or Record Video (30-second limit). They can record in Brightspace or upload audio/video.

The screenshot shows a user interface for evaluating an assignment. At the top, there is a 'Score' field with the number '8' entered and a maximum score of '10'. Below this is the 'Grade Item' label 'Mock Individual Assignment'. A 'Student View Preview' section is visible with a downward arrow. The 'Feedback' section contains a rich text editor with the text: 'You do a really nice job of describing an innovation that has caused you to become excited about your major or career field. I would have liked to see'. Below the text editor are three buttons: 'Add a File', 'Record Audio', and 'Record Video'. At the bottom of the interface are 'Update' and 'Retract' buttons, along with a circular arrow icon.

For more information on feedback and evaluating assignments, you can look at the help guide [here](#).

4.4 Creating and Using Rubrics

You can create rubrics when you create a new assignment. You can also add a rubric to an existing assignment by editing it.

Under the Evaluation and Feedback heading, scroll down to the rubrics setting.

Rubrics

[Add Rubric](#)

No rubrics selected.

5. Discussions

Much like Blackboard, the Discussions feature provides students with a place to discuss readings, assignments, and group activities.

Brightspace has a default Forum, the Learner Lounge, available in the Discussions section. This area is designed to be an informal space for students to converse. This function is particularly useful for online courses, where students will not have the opportunity to meet and get to know each other in person. Brightspace organizes Discussions into Forums and Topics. Forums provide a discussion section while topics are the individual discussion threads.

5.1: Creating Discussions

Create a new discussion Forum using the New button.

Here you can enter the topic of the overall forum.

You have the option to enter release restrictions and have options for display and response.

To create a new topic, select the New Topic option. You can also access this under the forum itself.

Topic		Threads	Posts
Casual Conversation ▼ This Discussion Board is for anything you would like to discuss. I will keep an eye on this board through the week. Please feel free to ask questions of your peers or share your thoughts. This would benefit others in this class.	Add Topic Edit Forum Hide from Users View Forum Statistics Subscribe Delete	0	0

Unit 1 Discussions ▼

Unit 1 Discussion Threads

Here you can create a new topic for the discussion forum, with similar restrictions and options.

Options

Allow anonymous posts ?

A moderator must approve individual posts before they display in the topic ?

Users must start a thread before they can read and reply to other threads ?

Rate Posts

?

You can use options to place restrictions on students' ability and access to post.

5.2: Adding Assessment to Discussions

To add assessment options to discussion posts, select the Assessment option from the upper menu.

The screenshot shows the 'Assessment' tab selected in a navigation menu with other tabs: 'Properties', 'Restrictions', and 'Objectives'. The main content area is titled 'Assessment' and contains several sections:

- Grade Item:** A dropdown menu with the text '-- Choose a grade item --' and a downward arrow. To its right is a blue link '[New Grade Item]' and a help icon (question mark in a circle).
- Score Out Of:** An empty text input field with a help icon to its right.
- Rubrics:** A blue button labeled 'Add Rubric'. Below it, the text 'No rubrics selected.' is displayed, followed by a blue link '[Create Rubric in New Window]'.
- Posts:** A checkbox labeled 'Allow assessment of individual posts' with a help icon to its right.
- Calculation:** A dropdown menu with the text '-- Select a calculation method --' and a downward arrow. To its right is a checkbox labeled 'Include unassessed posts in the calculated topic score as zero' with a help icon to its right.

Here you can follow the procedures outlined in section 3 to connect the discussion posts to grade items. You can also add rubrics and assess individual posts rather than a student's overall posting performance for the topic.

6. Building Your Skills: Additional Brightspace Tools

This section of the guide covers additional tools instructors can make use of in their courses, including tools for online course instruction, survey and quiz tools, and using video notes to give feedback. You can also find more information about these tools in the Brightspace Help Documentation.

6.1: Using Groups

Groups are a useful tool for team projects, particularly in online instruction. Having the group function active in Brightspace allows you to contact students in those group formats, as well as assign and grade group assignments.

To create a Group, go to the Groups tool under the Course Tools menu. Select New Category to create a new Group Category

Manage Groups

New Category

Categories

You have not defined any groups. Click New Category to create a new Group Category.

Here you can name and describe the category, as well as determine the group enrollment type.

Enrollment Type

of Groups - No Auto Enrollments

- # of Groups - No Auto Enrollments
- Groups of #
- # of Groups
- Groups of # - Self Enrollment
- # of Groups - Self Enrollment
- # of Groups, Capacity of # - Self Enrollment
- Single user, member-specific groups

Each option determines how students will be enrolled in groups. You can have students automatically allocated to groups or have students self-enroll. You can also restrict enrollment to specific courses you are teaching.

You can use groups to set up workspaces for students, as well as distribute individual assignments. For group projects, it is best to set up the details in Groups rather than Assignments.

Additional Options

▼ Collapse additional options

Create Workspace

Set up discussion areas 

Set up lockers 

Set up assignments 

File submission 

If you choose not to automatically enroll users, you can enroll users by selecting the group and choosing the enroll users option.

Edit Group - Group 1

Enroll Users

View Enrollment

Edit Group

Group Name *

Group 1

Note that some tools, like the Group File Locker, have limitations. The Group File Locker's capacity is only 49 MB.

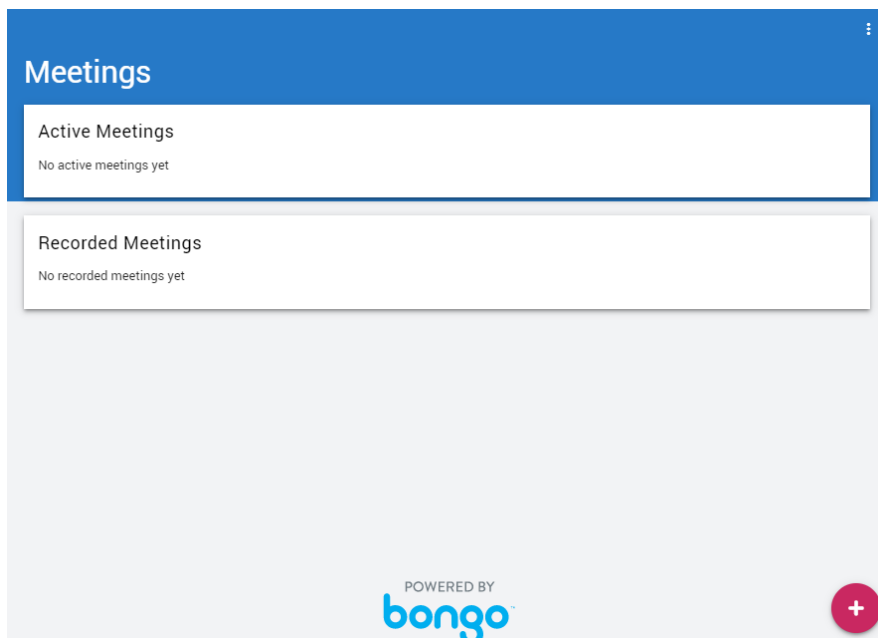

Groups are also useful for peer review, but you need to create/assign a separate category for those groups; otherwise, settings for the group project as a whole would apply to the peer review groups and to the groups for assignments

You can find more information on group creation and use by checking the documentation available in the Help section.

6.2: Using Virtual Classroom

The Virtual Classroom Tool provides online courses with a method of conducting synchronous instruction. The tools built into Brightspace give students a space to interact directly with instructors

Select the Virtual Classroom option under the Course Tools menu, and you will be taken to a screen that allows you to record classroom meetings.

Click on the plus sign in the bottom right corner to create a new meeting.

Schedule Meeting ×

Computer Pre-checks

- Please click [here](#) to ensure your computer is ready for your meeting.

Quick Tips

- We recommend using the latest version of Chrome, Firefox, or Edge (Chromium version). Safari for iOS devices
- **Use headphones** instead of speakers to prevent voice echo.
- Click the **Enter Meeting Room** button to enter the meeting, or click the **Enter Meeting When Started** button to be automatically entered into the meeting when it starts.

Session Management

Audio and Video →

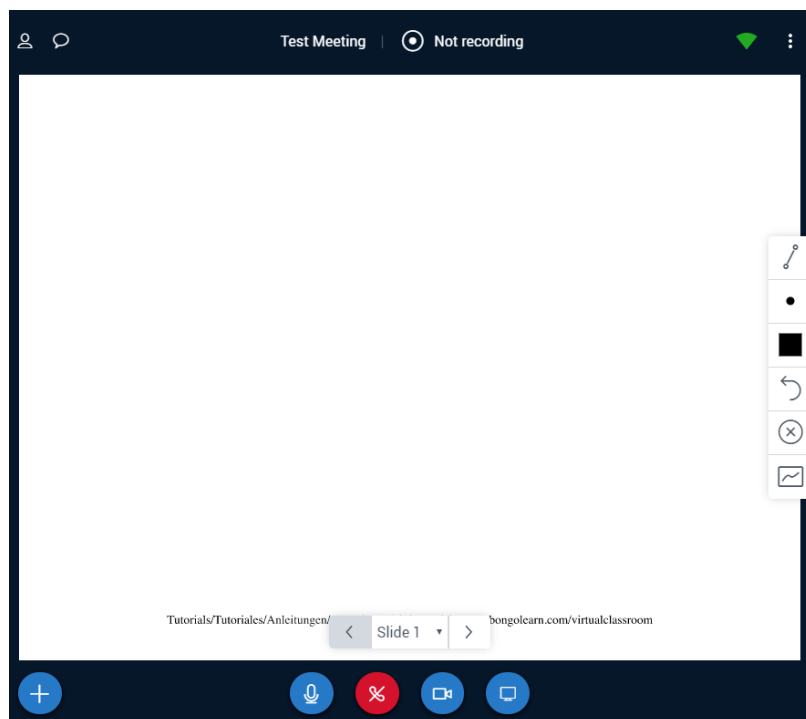

Recording →

Participation →

Your meeting starts in 3 days 2 hours 59 minutes

Enter Meeting Room

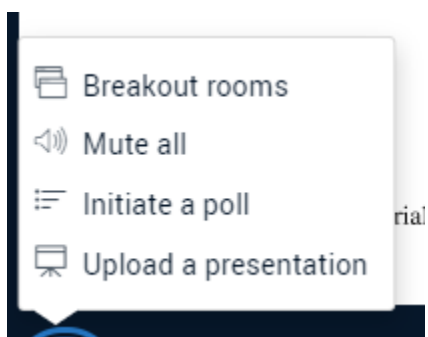

When you enter the meeting room, as the instructor you will be able to annotate the screen, draw, and upload slides.

Click on the turnaround icon to delete a single annotation. Click on the circle-x icon to clear all annotations. Click on the rectangle-zigzag icon to allow students to annotate the document/slide.

Click on it again to disallow this -- and instructors can then delete single annotations or clear all annotations.

Clicking on the plus sign in the bottom left corner allows you to use tools like creating polls and uploading presentations. Note that breakout rooms are a Premium feature. Instructors can also exit the presentation to display their video image, and they can also share their screen. There are multiple screens that can appear at once -- you can click on the icons at the bottom of the screen to toggle between these items or disable a view. This will increase the size of items you want to focus on. Beware: An item might look like it's larger on your screen, but that doesn't necessarily mean it'll be as large on students' screens. It may only be larger on the instructor's own screen, and this presents significant usability issues, especially if students are using tablets or mobile phones.

For settings, information, and to end the meeting, use the three dots up in the top right corner.

Refer to the Brightspace Help guide for more information about using Virtual Classroom. Please note that this option is not ideal for asynchronous learning, but can be used to record lessons and lectures for students to review.

6.3: Using Surveys and Quizzes

Survey tools are integrated directly into Brightspace to give instructors the means to contact students directly to get feedback on course content, preferences, and other information.

You can access Surveys under the course tools menu. Navigating there will bring you to a space to manage your surveys.

Selecting New Survey takes you to the survey creation tools, which allow you to title and categorize your survey much in the fashion of other Brightspace tools, as well as anonymize the survey so student names won't be recorded.

[Invite Participants](#)

You can write a description and a submission message using these tools.

Invite students to take the survey using the Invite Participants tab, and students will be notified that they have a new survey to take.

Much like other Brightspace tools, the Restrictions tab can restrict display times, dates, and options for the survey. The Objectives tab allows you to connect your survey with specific course objectives.

Quiz tools allow instructors to provide assessment, and are particularly useful for integrating reading quizzes and other testing tools into course content.

The screenshot shows the top navigation bar with links for 'Manage Quizzes', 'Question Library', 'Statistics', and 'LockDown Browser'. A 'Help' icon is in the top right. Below the navigation bar are three buttons: 'New Quiz' (highlighted in blue), 'Edit Categories', and 'More Actions' with a dropdown arrow. To the right, there is a 'View:' dropdown menu set to 'By Availability' and an 'Apply' button. Below these elements is a large light blue box containing the text: 'You haven't created any quizzes. Click **New Quiz** to add a new quiz.'

Much like the survey tool, you have the option to create a new Quiz upon navigating to the Quizzes section of your course site.

Selecting New Quiz also functions similarly to the surveys function, pulling up a screen allowing you to name your quiz and add questions.

The screenshot shows the 'Properties' tab of a quiz configuration screen. The 'General' section is active, showing a 'Name' field with the text 'Reading Quiz'. Below it is a 'Category' dropdown menu set to 'no category', with a link to '[add category]' and a help icon. The 'Quiz Questions' section below indicates 'This quiz is empty.' and features an 'Add/Edit Questions' button.

Selecting Add/Edit Questions will bring up a dialog box for a new quiz.

Question Pool

This section looks similar to the survey questions add tools, allowing you to edit and create different questions for the quiz you are constructing. You also have the option to allocate point values for each question here.

Also, once you have added a question here, selecting the Add button displays a dropdown menu to add additional questions.

Reading Quiz

To return to the quiz, select 'Back to Settings for Reading Quiz' at the top of the page.

Advanced options for quizzes include additional grading and display options. You can also connect the quiz to grading options under Assessment. Restrictions, as with other Brightspace tools, determine quiz availability and deadlines.

6.4: Embedding Video and Video Notes

Brightspace has robust video tools that allow instructors to deliver verbal and visual feedback to students, as well as provide course video content directly in Brightspace.

You can insert video instructions in Announcements and other similar Brightspace tools. To do so, select Insert Stuff in the Content section.

After you record your message, you can hit next and be taken to the annotation tool. This tool is helpful for students who are unable to access the video and should be filled out thoroughly to adhere to accessibility standards.

Insert Stuff ×

Add Video Note

Enter a video note description. A description is useful to users who are unable to view the video. You may also modify the title of the recording.

You can also insert video content into your course using Kaltura tools, which were previously accessible to Blackboard users and frequently utilized by instructors teaching online. You can add Kaltura media using the Insert Stuff Tab.

To Add Kaltura Media to course content, Select Existing Activities in the page edit function.

Add a description...

You can also access Kaltura content via the Course Tools menu. Access the media gallery for Kaltura content available to Purdue users and the Kaltura My Media section to access your Kaltura videos and content.

7. If Migrating Blackboard Content

Though the primary recommendation of the PW Admin team is to build courses from scratch in Brightspace to familiarize yourself with all the tools available, the impending removal of all content from Blackboard means we also recommend migrating course content for archival purposes as well as course building purposes.

The deadline for initiating the course migration process is August 17 -- and that access to Blackboard will be discontinued on August 24.

Purdue TLT have provided thorough instructions for migrating course content from Blackboard to Brightspace, which can be found [here](#).

Note that the transfer of content does not include student information, including grades, only course content. Contact tlt@purdue.edu to schedule a consultation concerning exporting student data.

The course migration process is expected to take **three to seven business days**, so plan accordingly if you wish to migrate your content.

8. Resources and More Information

Brightspace provides both video and written documentation of tools to help both instructors and students succeed in their use of the platform. To make use of these help tools, navigate to the **help** page on the black course toolbar.

Purdue as a whole also offers information, training, and resources to assist in the implementation of Brightspace. Go to the Brightspace Implementation page [here](#) for more resources and information on moving content, training workshops, and building new course content.

If you have questions for the Professional Writing Administrative Staff while you are creating and designing content for Brightspace, reach out to program director Jenny Bay (jbay@purdue.edu) for assistance and guidance. The Professional Writing team maintains resources and tools to help instructors and will be happy to provide guidance during the summer and fall of 2020 to aid in the transition between systems.

Special thanks to Tracy Clark for help assembling screenshots and providing valuable feedback and contributions to the 1.0 version of this guide.
